Energy Saving

Each raw material used, each productive process and each technology of the complex activity of the Tabriz Group sites are studied in order to reduce the environmental impact, by saving recycling, filtering, with the will of transforming the waste in resources and optimize the use of energy. Tabriz TILE Group is on the cutting-edge of adopting ecologically sustainable practices and this is demonstrated by the most accurate controls, repeated on a daily basis.

Low Gas Emissions to Atmosphere

Products commercialized by TABRIZ TILE GROUP meet all the norms required by global manufactured goods, imposed by the global law concerning environmental issues. These legal requirements have encouraged us even further when setting our own international goals; leading to a minimization of any environmental impacts which can derive from our manufacturing process.

Water Recycling From The Production Process

We reuse of the water from our production processes, apply cogeneration to make the most of the energy we use, reintegrate the waste products from each process into our ceramic tiles.

Recycling of Fired Material

TABRIZ TILE GROUP is committed to the principles of ISO 14001-2015 environmental management standards. Green goods production in order to minimize the environmental impacts in their life cycle reduce waste production, and promote environmental culture development is one of the most significant priorities in this industrial group.

- In order to properly install the products, the cross or parallel linings should be used. The cross parallel linings are used for more beautiful installation, where the important technical issues (concerns), the alignment of the products and the prevention of any deformation on wall and floor surfaces should be considered.
- The minimal use of the offered cross linings will help you to make your ceramic installation more comfortable, fascinating and elegant. Therefore, in order to prevent any fault, the following items should be considered:
- Rectified products: at least 2 mm
- Non-rectified products: at least 2 mm
- Rastic products: 3 - 5 mm
- Remark: Regardless of the values written, the compliance with the installation rules of each region (country) is necessary, when the products are installed.

- Para instalar correctamente los productos, se deben utilizar los revestimientos cruzados o paralelos. Los revestimientos paralelos cruzados se utilizan para una instalación más bella, donde se deben considerar los problemas técnicos importantes, la alineación de los productos y la prevención de cualquier deformación en las superficies de la pared y el piso.
- El uso mínimo de los revestimientos cruzados ofrecidos lo ayudará a hacer que su instalación de cerámica sea más cómoda, fascinante y elegante. Por lo tanto, para evitar cualquier falla, se deben considerar los siguientes elementos:
- Productos rectificados: al menos 2 mm.
- Productos no rectificados: al menos 2 mm.
- Productos rásticos: 3 – 5 mm.

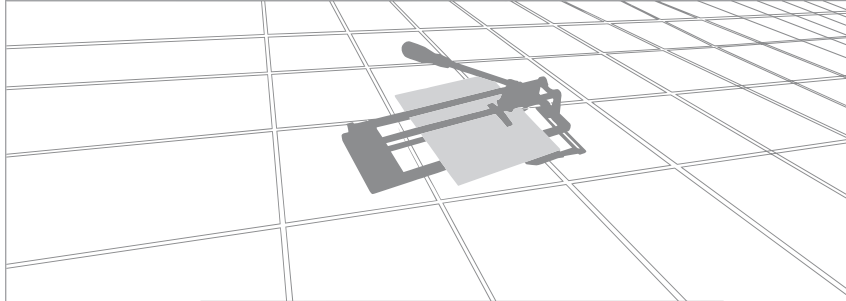

Observación: Independientemente de los valores escritos, el cumplimiento de las reglas de instalación de cada región (país) es necesario cuando se instalan los productos.

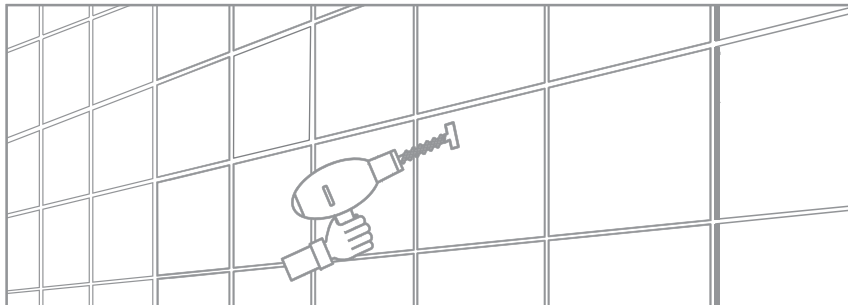

- The use of filler mortars, tile adhesives and other adhesives should be proportional to the type of purchased product and these should be usable in the interior-external spaces, floor-wall surfaces and flat and non-planar surfaces.
- remark: The manufacturer instructions should be read necessarily when installing.
- El uso de morteros de relleno, adhesivos para losetas y otros adhesivos debe ser proporcional al tipo de producto adquirido y estos deben ser utilizables en los espacios interiores-exteriores, superficies de piso-pared y superficies planas y no planas.
- Observación: Las instrucciones del fabricante deben leerse necesariamente al instalar.
