SUSTAINABLE TILES

As part of Megaker culture and goals, the care for the world heritage is a must. Megaker production philosophy is based on quality and innovation, with special attention to the environment using the latest technologies.

Megaker believes that to protect the environment for future generations must accept some responsibility for maintaining the planet. Therefore, it is our duty to prevent environmental degradation and work in conditions in a way to ensure the health of workers and the nature at the same time.

The preservation of environment is constantly a priority of Spainker from the moment we select our raw materials, up until the moment the finished ceramic tiles are dispatched from our warehouse.

HIGH PERFORMANCE TILES

We understand that our parts must be unique and irreplaceable, looking to the future, we wanted to design a smart material, a product without limitations or restrictions for the most demanding architecture, capable of adapting to the most special projects. The diversity of big formats of these pieces allows covering the space from floor to ceiling with a single piece, creating an infinity effect to the eye.

The full body porcelain tile delivers certain advantages vs other collections, without losing all benefits the glaze porcelain offers, its main feature resides in its inside. The raw material that shapes the tile become uniform without any superficial decoration that delivers the same aesthetic throughout the tile, this particularity make it the best fit for all those spaces that demand the most hard wearing materials.

**FULL BODY
Technology**

Megaker introduces an innovative technology that allows to design the core of the parts from the custom selection of each of its components, combined in different proportions, colours and gradients. The core design is a fundamental part of the surface appearance of the part, allowing it to look like a complete piece and achieving impeccable consistency between the surface, the interior and the edges. This fact dramatically increases the potential for producing worktops and decorative surfaces with visible edges.

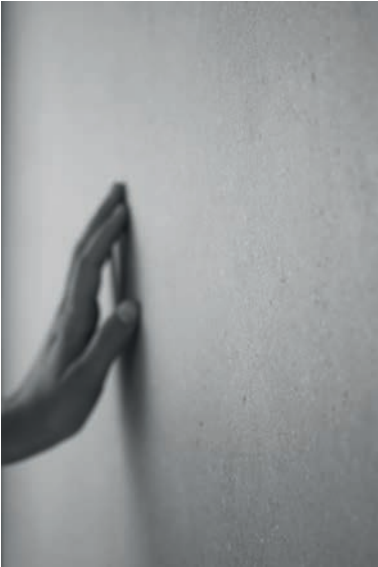

**DIGITAL STRUCTURE
Technology**

Our collections with 3D-Fit® textures use an innovative 3D digital graphic printing technique. This process allows the image and textures of the ceramic to work seamlessly together, so that, together with the core designed using this technology, it creates a much more realistic looking surface and gives each piece a unique and special character.

With materials like wood or stone, this effect could only be achieved if the texture and graphics were intrinsically linked. Now, as a result of our RDI, 3D-Fit® can be applied to a selection of our Series. The highest level of definition to make each surface appear much more realistic.

3D-Fit®
Technology

Glossy Polished

With a high-gloss, perfectly smooth finish, the polished surface exhibits a full range of tones. A gloss that does not scratch the surface of the tile, does not fade or show signs of wear.

Matt

Matte finished is covered in a non-shiny glaze that is applied with an ink jet machine or in a waterfall stream glazing method. This process yields tiles with a flat finish that do not reflect light and offer a contemporary look.

Anti-Slip

Our new anti-slip finish presents a new smoother appearance, while maintaining all the properties that guarantee total user safety to be used on outdoor surfaces and wet areas, such as the edges of swimming pools or snow and rain climates.

Honed

Surface finish with a soft and pleasant touch, made by lapping that respects the digital texture of the piece, which coincides with its graphic and gives a great realism to the surface of the material.

Lappato

Lappato finished is basically a shiny texture that is added to the surface of the tile to give it a semi gloss appearance. Depending on the viewing angle, the light dances on the surfaces or disappears on the matt textures.

All our collections suggest a rich blend of materials and finishes. They are designed as a whole, so that they are easy to combine with each other, regardless of the line and the chromatic choice. All the collections are found in a wide range of formats, responding to the contemporary architecture's demands and allowing almost infinite combinations. We have used current technologies such as ceramic color digital printing, and technology forefront methods such as directly printing on the glazing and "mascaring", which have enabled us to create light and beautiful designs with great personality and with unprecedented finishes and textures.

Recommendations

Slab tiles can be installed both inside and outside the house, and it is used for floor and wall. The most technical characteristics of porcelain slabs are included, the resistance against freezing, staining, surface scratches, water absorption and so on. As a matter of fact, by correct installation of slabs, the most house and commercial facility needs will be fixed.

Packaging and storage are done on wooden boxes and metal structures, and the best way to maintain the quality of the product is to keep them in the original packaging.

Installation Recommendations

- 1 CONFORMITY OF TONE AND CALIBER OF THE MATERIAL.
- 2 MAKE SURE THAT THE AREA TO CLAD IS CLEAN AND DRY.
- 3 CEMENT-BASED ADHESIVE SHOULD BE USED FOR EACH TYPE OF PRODUCT; PORCELAIN COLOR BODY OR WHITE BODY.
- 4 THE AREA TO CLAD MUST BE UNIFORMLY LEVELED. THE USE OF LEVELING SYSTEMS IS MANDATORY FOR A PERFECT INSTALLATION.
- 5 THE RECTANGULAR FORMATS CANNOT BE PLACED UNITED TO ANY MORE THAN 1/4 OF THE PIECE.

THE SLAB INSTALLATION REQUIRES THE USE OF TOOLS AND SPECIFIC TRAINING BY THE INSTALLER. IN ADDITION TO THE ABOVE, THESE ARE SOME OF THE RECOMMENDATIONS TO TAKE INTO ACCOUNT IN THE INSTALLATION OF LARGE TILE FORMATS:

CUTTING DETAIL WITH GUIDE ON SLAB

THE TILES PROPERTIES MAKE THEM EASY TO CUT

- 6 THE DOUBLE BONDING TECHNIQUE MUST ALWAYS BE USED.

THE SLAB INSTALLATION REQUIRES THE USE OF TOOLS AND SPECIFIC TRAINING BY THE INSTALLER. IN ADDITION TO THE ABOVE, THESE ARE SOME OF THE RECOMMENDATIONS TO TAKE INTO ACCOUNT IN THE INSTALLATION OF LARGE TILE FORMATS:

- 7 THIS MATERIAL REQUIRES THE USE OF C2 CLASS ADHESIVES (BICOMPONENT TYPE S2).
- 8 THE APPEARANCE OF AIR POCKETS BETWEEN TILE AND SUBSTRATE SHOULD BE AVOIDED BY THE SYSTEMATIC KNOCKING OF THE TILE WITH A RUBBER TROWEL. THIS WILL AVOID TENSIONS AND BREAKS AFTER THE MATERIAL HAS BEEN SET.
- 9 THE USE OF SPECIFIC TOOLS FOR INSTALLING CERAMIC TILES IS MANDATORY. CONSULT YOUR TRUSTED SUPPLIER TO RECEIVE INSTRUCTIONS ON THE CORRECT HANDLING OF THESE TOOLS AND THEIR NEEDS.

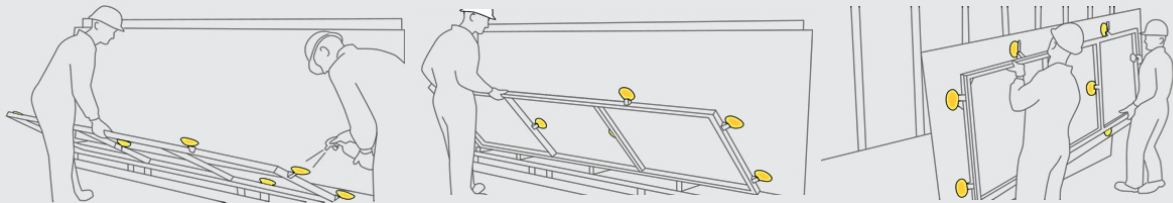

Big Slab Installation Video

General Transport Advice

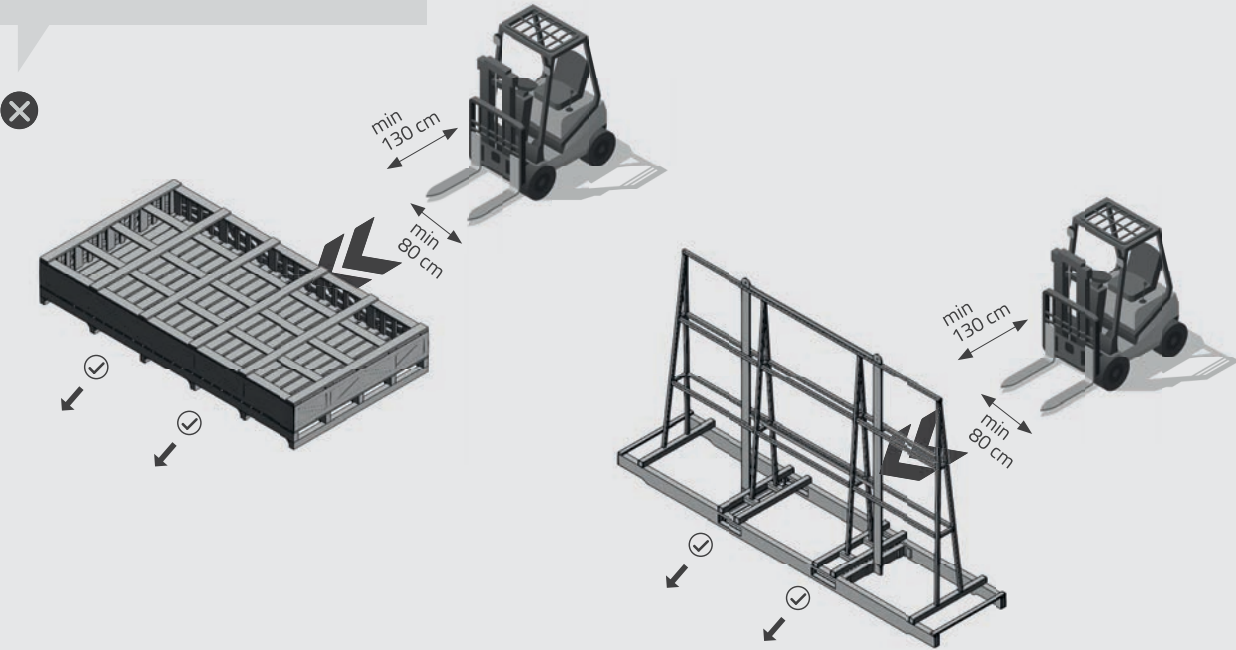

LOAD WITHOUT TRANSPORTER IS NOT RECOMMENDED. IT IS ESSENTIAL TO READ THE UNE138002 & UNE12004 STANDARD, TO ACHIEVE A CORRECT PLACEMENT OF THE CERAMIC TILE. ALWAYS USE SPECIFIC TOOLS FOR MOVING THE SHEETS.

HANDLING AND SETTING OF A SLAB BY USING SUCTION FRAME

LOAD FROM CENTER NOT ALLOWED

Installation

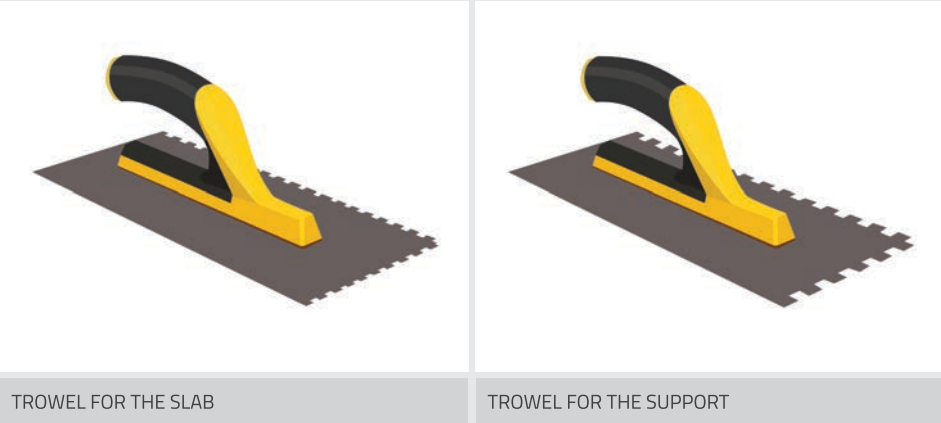

The place where the slab is installed is important to correct installation. Before starting the installation stage, it is best to check the following characteristics of all types of substrates:

- Be sure that, it is free of any grease, oil or dust.
- It is essential to fill any gaps in level by using the proper leveling devices.
- The flat installation surface has a very important effect on reducing the amount of glue used during installation and it also prevents surface cracks.
- The surface should be completely smooth and without any cracking.

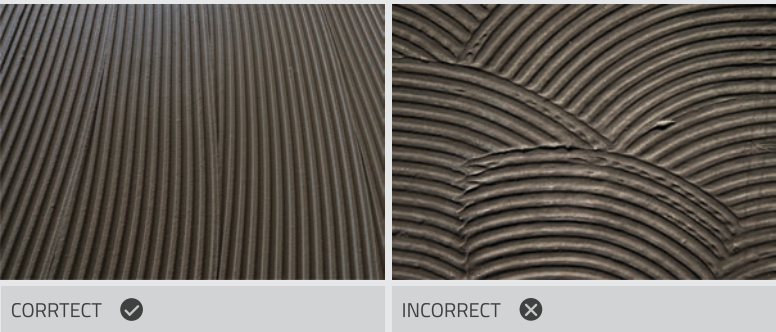

Installation Method

According to the preparation method mentioned in the package, after preparing the glue by using a mixer, apply it continuously. In the first step, the glue is applied to the back of the slab (with a 3-4 mm trowel) then repeat the same amount of it on the surface of the slab placement (with a 10 mm trowel).

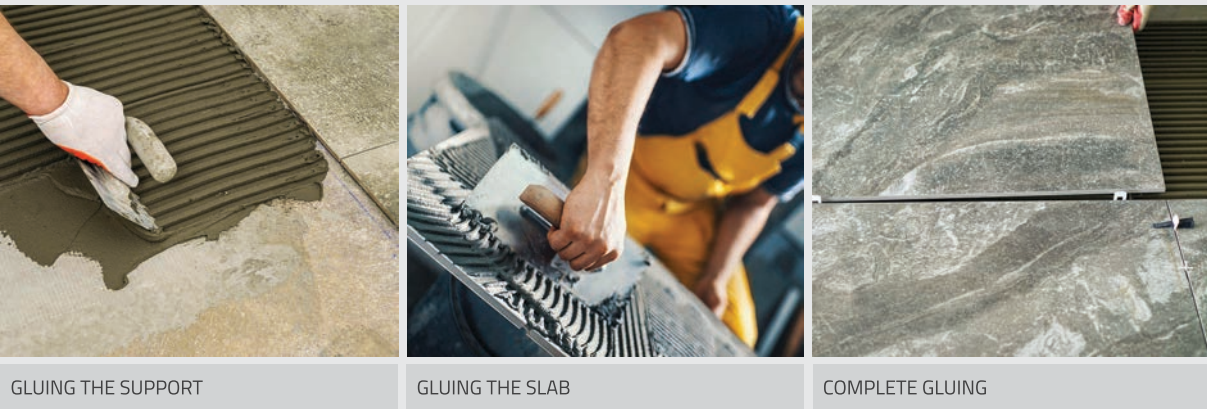

According to the picture below, the correct way for applying glue is shown.

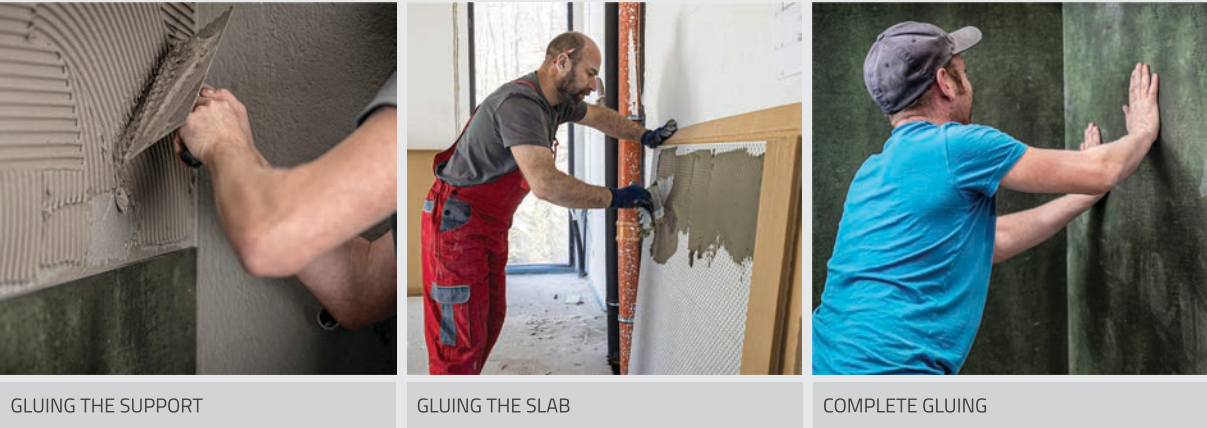

Setting

Once both surfaces are ready to be installed, then place the Tabriz tile group slab into the final installation position.

FLOORING

WALLS

After installation, in order to remove gaps and air bubbles between the slab and the installation surface, a vibrating device should be used.

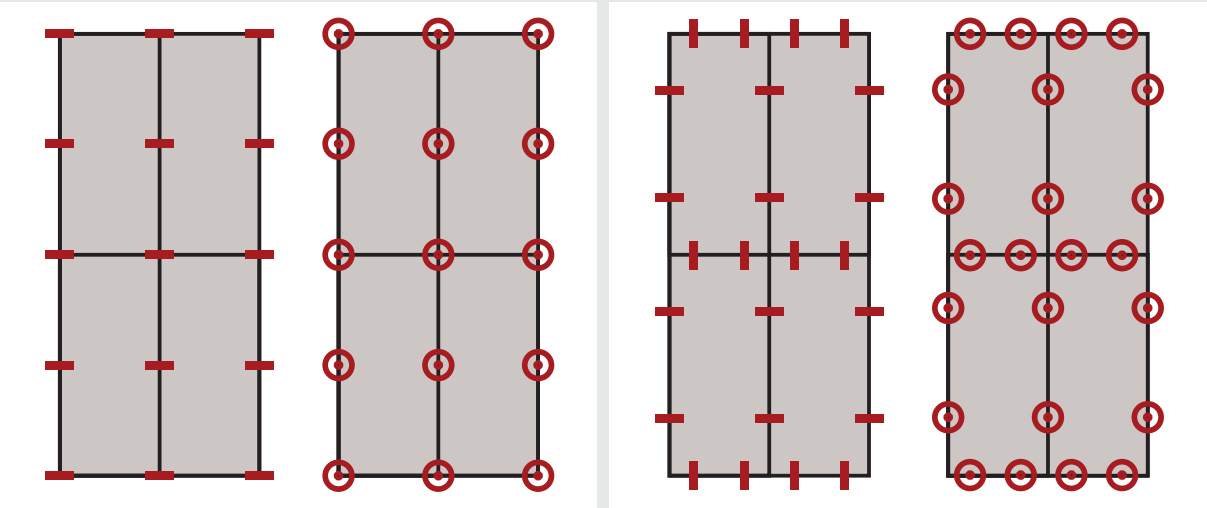

According to the picture below, the best way to be sure that the slabs were placed in the right position, is to use the wedges and supports system. Using this method make the slabs more firmly stuck to the glue and also reduces the installation time.

LEVELLING

In order to have the best installation quality of slab products, use wedges and supports system at a distance of 40-50 cm from each side, after applying glue.

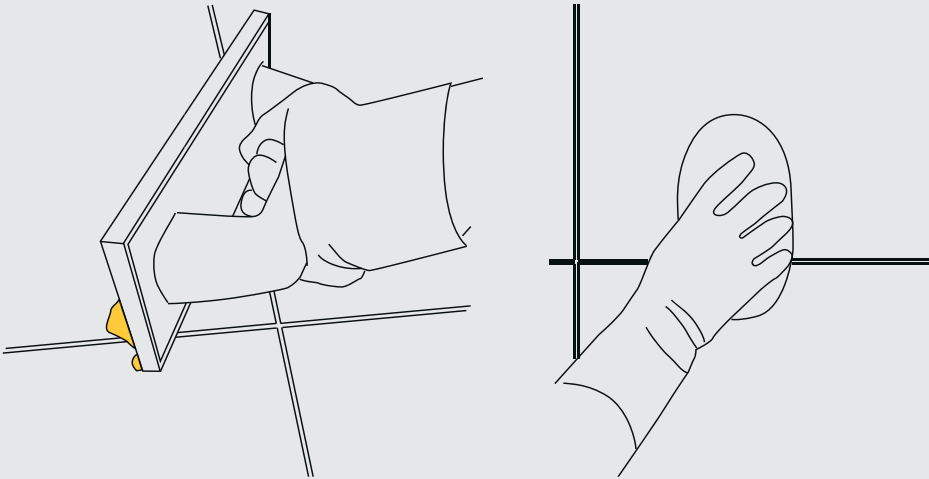

For using the best conditon of wedges and supports system, it is recommended to install them in the middle and in the opposite direction of each other. In this condition the pressure is applied equally to both slabs at the same time. And also note that, it is important to use a Grouting to the thickness of at least 2 mm.

SUPPORTS

Grouting

Grouting should be done with powder (antibacterial). If the broken part of the support remains inside the grouting, before pulling the grouting material, use a steel plate to completely empty the grouting (the best way is using adhesive tape on both sides of the grouting).

GROUTING PIECES

CLEANING

Cleaning & Maintenance

Once placed and grout cleaning equipment is mandatory. Improper cleaning may leave traces of products used in the placement or the protection of the tiles, as cements, resins epoxilicas, grout, waxes or fats. For optimal cleaning after placement for cases of intense and stubborn dirt accumulated over time, and for maintenance, required to use the right products. The following table shows some of the recommendations.

TYPE OF STAIN	RECOMMENDED CLEANING PRODUCT
Cement and lime wastes	Diluted organic acids (vinegar) or alkaline-based detergents.
Oxide remnants	Phosphoric acid or acid-based detergents.
Oils	Ethyl alcohol or alkaline-based detergents.
Greases	Diluted organic acids (vinegar) or alkaline-based detergents.
Inks	Diluted sodium hypochlorite (bleach) or acid detergent.
Coffee	Dilute solution of sodium hypochlorite or alkaline detergents.
Rubber	Organic solvents (trichlorethylene, thinner).
Paint	Specific solvent or paint stripper.
Tar	Trichloroethylene.
Fruit juices	Sodium hypochlorite (bleach).
Permanent marker	Organic solvents (acetone, trichlorethylene).
Aluminum mark	Acid detergent.
Blood	Hydrogen peroxide (h2o) or sodium hypochlorite.
